Rules concerning Husbandry.

WHen you would Plant or Graft, consider where the wind bloweth, if it be in the South, it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or graft generally the Moone increasing in these signes, *Taurus*, or *Aquarius* in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in *Taurus*, *Leo*, or *Aquarius*.

Cut timber to have it sound, in *December*, or *January*, in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the moneth of *Febr.*

Plash hedges and Lop trees for fewell, that the heads may be sooner grow again, when the Moone is in *Aries*, or *Libra*, and in her increase.

Set young Quickfets, from *September* to *March*.

Remove young trees in the last quart. of the ☾, when she is in ♈, ♎, ♑; and in these months *Septemb. Novem. Febr.*

Set Vines in *February*, *March* or *September*, specially the Moone in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose trees in the midst of *February*, the ☾ increasing.

Cut or prune trees in *March* or *Aprill*, the Moon in *Taurus*, *Virgo* or *Capricorne*.

Gather fruit, as Apples, Pears, and the like, at the full ☾, in the after-noone, the weather being faire and dry.

Cut downe Hay presently after the full of the Moone.

Dung ground to prevent growing of weeds, the Moone increasing.

Sow Carret-seeds about the end of *February* or the beginning of *March*, the Moon increasing. Also, sow Onions and Leekes in *February* or *March*, at the wane of the Moone.

Sow Cucumbers and Millions in *February*, *March* or *April*, in a hot and faire day.

Sow Parsly, Fennel, and Anniseed, in *February* or *March* the full of the Moone.

Sow Marjerum, Violets, Time, Rosemary and Lavender, in *February*, *March* or *Aprill*, in the increase of the moone.

Sow Gilliflowers and Wall-flowers in *March* or *April*, in the old of the moone.

Sow Hysop and Savory in *March* when the moone is old.

Sow double Marigolds in *February* or *March*, in the increase of the moone.

Sheare Sheepe at the increase of the moone.

The best time to Geld cattel the Moone being in *Sagitarius* or *Capricorne*.

Of Blood-letting, and some other Physicall Observations.

IN Youth let blood from the change to the first quarter, in middle age, from the first quarter to the full. In Elder [illegible] from the full to the last quarter. In old age, from the last quarter to the change.

But know, that under the age of 14. and above the age of 56. it is not good to bleed at all.

Againe, in the Canicular or Dog dayes, it is very hurtfull to take any Physick at all, unless there be great need, and [illegible] necessity hath no law: Wherefore in such a case, the [illegible] being desperate, the cure must be adventured.

Take a purgation when the Moone is in Trine, or [illegible] aspect, with Venus decreasing in any of these three [illegible] Cancer, Scorpio, or Pisces, and it will be sure to [illegible] better, because when a moyst Planet, in a moyst signe [illegible] an aspect, the humours in the body are then stirred up and [illegible] and so the better purged out, wherefore in this case, it [illegible] amisse to prepare humours by some thing that is laxative [illegible] let this be done whilest the Moone is either in Gemini, [illegible] or Aquarius.

Take a vomit that it may worke throughly, when the [illegible] is in Aries, Taurus, or Capricorne: and know that the [illegible] of the Moone with Saturne, or Mars, or the Moone in [illegible] ought to be eschewed in the taking of medicines.

Finally, if necessity urge no hast, these observations are [illegible] dient: for it is a plaine truth, that the change of weather [illegible] differing aspects, doth greatly change and alter mens bodies
